

Docebo Learn (LMS)

Align the needs of your organization with those of your learners with an LMS that uses learning-specific Artificial Intelligence algorithms to produce deeper and more effective learning experiences.

Make learning your enterprise's competitive advantage
with our AI-powered LMS

EASILY SEARCH AND DISCOVER LEARNING CONTENT WITH AI

Powers your onboarding efforts and ignites employee growth by giving you a learning ecosystem to centralize, organize and distribute courses, track certifications and measure results. Powered by artificial intelligence, Docebo Learn (LMS) **automatically tags** your content to **produce deeper search results**, while deep global search makes it easier for your learners to discover content that means something to them.

SCALE TO MATCH THE PACE OF GROWTH

Docebo Learn (LMS) seamlessly scales to meet the evolving needs of organizations of any size. Docebo's progressive suite of apps and features adapts to your unique needs, **scaling as learning projects become more sophisticated**. By employing the latest technology available, such as Amazon Elastic Compute Cloud and Simple Storage Services, Docebo guarantees enterprise-grade network performance, scalability and elasticity.

SLASH ADMIN TASKS THROUGH AUTOMATION

Eliminate **cuts tedious and error-prone admin tasks by automating them** to give learning admins more time for other valuable activities. Define rules, let the system do the work, and don't worry about enrolling users manually ever again.

IMPROVED VISIBILITY PRODUCES BETTER TEAMS

My Team gives managers **unprecedented access to directly monitor their team's learning activities** and address overdue certifications. **Alleviate pressures on L&D admins** by giving managers a way to assign, enroll or suggest team members relevant learning assets directly.
