

# The Tech Skills Gap Is Real

Docebo surveyed 2,000 workers in the US and UK, uncovering that while respondents depend on technology to do their jobs, the majority admit they lack the necessary skills to succeed.

## Key findings

4 out of 5 employees use technology to perform their jobs, such as using email, building databases, coding, interpreting data and more.

Yet, 1 in 3 say they don't have the necessary tech skills to succeed in their current jobs.

On top of this, 20% say they don't receive any tech training at all.

## How Do Your Employees Excel in the Digital World?

Training tools that deliver personalized and accessible content ensure employees have the necessary skills and access to knowledge to excel in the digital world, close skills gaps, and embrace new technology.

Of employees believe training in new technologies would help them increase their annual salary or chances for a promotion.

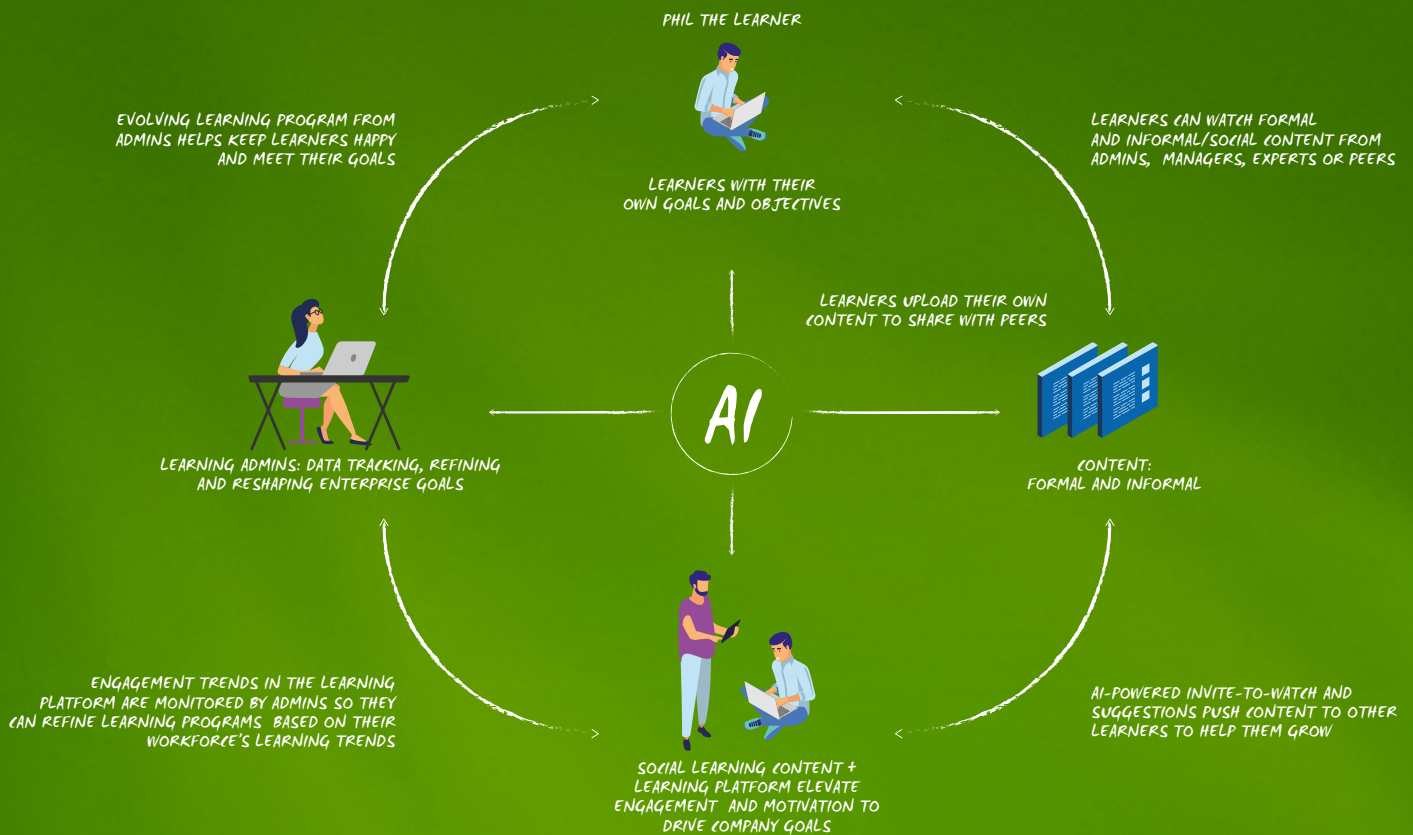

However, 1 in 5 employees don't feel they have the necessary tech skills to position themselves as an experienced candidate.

# The Docebo Learning Platform

Employees are hungry for learning that enhances their tech skills.

Give them control with a learning platform powered by artificial intelligence that makes relevant learning content easily discoverable, accessible and shareable.

## CONTINUOUS

The platform suggests the most relevant and useful learning content to ensure employees have the knowledge they need to excel, while establishing a cycle of continuous learning.

## STREAMLINED

The artificial intelligence engine analyzes all learning assets, identifying key phrases and creating tags automatically to elevate categorization and make it easier to find through search.

## PERSONALIZED

The platform recognizes what content format a learner engages with most (videos, quizzes, podcasts), recommending resources that align with their preferences to deliver a more effective experience.
